Odell Brewing Company
Software and Database Engineer

Odell Brewing Company is looking for our next co-worker. We have been brewing great beer for 26 years and are looking forward to our next 26 years. We are in need of a Software and Database Engineer to allow our co-workers to keep focusing on making great beer.

The ideal candidate will have a passion for craft beer and the craft beer community. He or she will need a positive, can do attitude. This person will be enthusiastic about improving our co-workers IT experience, comfortable with frequent interruptions, progressing internal software development and capable of communicating complex IT issues.

Essential Job Functions:

Project Management and Administration
- Drive existing architectures and prepare roadmaps for augmenting, redesigning, or implementing new systems for reporting and cross-platform integration
- Willingness to learn industry-specific logic and relation to key internal metrics and processes
- Create and maintain design models, specifications, diagrams, charts and documentation as it relates to system configuration, software, licensing, mapping, processes and service records
- Interact and negotiate with vendors/contractors to secure system-related products and services

Maintenance
- Deploy applications, software and operating systems (including new installations, enhancements and upgrades)
- Assist in periodic maintenance of database-related software and hardware items

Help Desk and Co-worker Support
- Collaborate with co-workers to ensure smooth and reliable operation of software and systems for fulfilling business objectives and processes
- Provide orientation and training to end-users for all modified and new systems
- Responsible point of contact to users of internally and externally developed programs and apps
- Assist other co-workers with onsite and remote support for IT issues

Database Management and Programming
- Comfortable working with MVC and existing architectures
- Maintenance and troubleshooting of SQL and Microsoft Access databases
- Knowledge of ODBC, MySQL, MSSQL and related query-based languages
- Creation and maintenance of various scripts for business resources and cross-platform compatibility
- Proficiency in object-oriented languages, a background in programming is required

Industrial Experience (preferred, but not required; willingness to learn)

- Automation controller network communication design and maintenance
- Ability to set up periodic backups of PLC programs to network
- HMI configuration and setup experience (Allen Bradley, Rockwell Automation or Ignition Software)

Essential Job Requirements:

Education: College diploma or university degree in the field of Computer Information Systems preferred; will consider an Associate degree in Information Systems

Experience: 1 to 3 years equivalent work experience

Certifications: Industry-based certificates preferred but not required

Required Skills: Overall emphasis on MVC style architecture + development and relational database design. Candidate will be proficient in SQL, PHP or related object-oriented programming languages. Working knowledge of MS Access, VBA, and Crystal Reports a plus. Desire to implement and learn new languages as they relate industry-specific programs.

Effective interpersonal and relationship-building skills, strong written and oral communication skills and the ability to present ideas in user-friendly language. A passion to learn and experience working with a team-oriented, collaborative environment.

Work Conditions

- Lifting and transporting of heavy to moderately heavy objects, such as computers and peripherals
- After hours and weekend on-call support required (ability to work around production schedules)

Benefits

- Medical/Dental/Long Term Disability/Vision benefits
- Profit sharing/ESOP
- 401(k) plan with company match
- 14 days PTO
- Paid holidays
- Weekly beer allotment
